Mobile UF-RO Water Purification

Mobile Water Purification For:

- ◆ Emergency response to customer plant failure
- ◆ Supplemental water processing for raw water quality excursions
- ◆ Replacement water processing for planned plant maintenance

Wigen Mobile UF-RO Includes:

- ◆ UF and RO in one trailer
- ◆ Single or two pass RO operation
- ◆ HVAC controlled environment
- ◆ Chemical injection & Clean-In-Place
- ◆ Rapid start-up upon delivery
- ◆ Trained operators with remote monitoring

Wigen Mobile Water Purification

Performance Options:

- ◆ **UF Only** : 700gpm
- ◆ **RO (Single Pass)** : 450gpm
- ◆ **RO (Double Pass)** : 225gpm

Markets Served:

- ◆ Municipal
- ◆ Mining
- ◆ Power Generation
- ◆ Wastewater Recovery
- ◆ Refinery

Combining UF and RO systems in one trailer streamlines setup compared to using separate trailers, reducing equipment footprint and allowing rapid start-up in the field.

At Wigen Water Technologies, all our equipment is engineered and manufactured in our facility in Chaska, Minnesota. The integration of our project management, engineering, production, and field service teams at our facility results in the highest level of quality control and ensures fast deployment to customers of our mobile equipment.
